Supporting Healthcare in Low Resource Environments

THE ROYAL
COLLEGE OF
SURGEONS
OF EDINBURGH

Take your next step with The Royal College of Surgeons of Edinburgh

The Royal College of Surgeons of Edinburgh is an independent membership organisation dedicated to the education, training and advancement of surgeons, dentists and individuals throughout healthcare who are involved in the surgical care of patients. The College has a current membership of approximately 30,000, with members spanning over 100 countries. From our founding in 1505, the College has been committed to the advancement of surgery and driving patient safety standards worldwide.

Our membership touches every stage of the career path from medical student to consultant. We are a family of Surgeons, Dental Surgeons and members of the Surgical and Dental teams who put Patient Safety at the heart of everything they do.

Feel supported at every step of your career with RCSEd and begin your journey today:

	Conference Close	
13:00-13:15	Conference Close William Bolton, <i>GASOC President 2022</i>	Main Stage

GASOC INTERNATIONAL CONFERENCE 2022

Skill Sessions

Skills Session 1

Trainee perceptions of Global Surgery and our role as advocates

Organised and delivered by Catherine O'Brien, Alice Campion, Leonid Daya, Reema Patel, Elizabeth Vincent and Ryan Ellis

This session aims to provide a platform for international SOTA care trainees to discuss their perception of Global Surgery, their experience thus far and the motivation they have for involvement in Global Surgical research and clinical practice. It aims to discuss the role of the trainee in advocating for equitable, collaborative, sustainable and useful global surgical partnerships.

Skills Session 2

Research Skills in Global Surgery

Organised by Fiona Linton and Sara Mohan

Wondering how to start off or maximise opportunities in global surgical research? This skills session aims to inspire and equip you as we have 2 speakers with extensive experience in global surgery research - Professor Kokila Lakhoo (Consultant Paediatric Surgeon at the Children's Hospital in Oxford and the University of Oxford, President of the Global Initiative for Children's Surgery (GICS), and Chair of the international forum for the British Association of Paediatric Surgeons) and Dr Michelle Joseph (a Specialist in Trauma and Orthopedic Surgery, a Visiting Fellow in the Program in Global Surgery and Social Change in Harvard Medical School, Blavatnik Institute of Global Health and Social Medicine). They will talk about their work, the importance of research in global surgery and the challenges and importance of equity in this field. There will also be time for discussion and questions at the end.

Skills Session 3

Sustainable Innovation Skills

Organised by Gerard McKnight and Simon Lambracos

This session is led by Dr Alice Clack, Consultant Obstetrician and Sustainable Education Fellow at the Centre for Sustainable Healthcare. Have you wondered how to make an operating room more sustainable? Then this is the session for you! You will learn about the principles of frugal innovation and apply them to design a 'Green Operating Room'.

Skills Session 4

Preparing and Designing your Global Health Trip

Organised and delivered by Jan Man Wong

This session aims to provide an evidence-based facilitated discussion in preparing and designing your global health trips. Discussions will surround personal, clinical and practical preparedness and some interactive facilitated reflection.

stryker

Protecting you,
while you **protect others**

Stryker at GASOC 2022

We are looking forward to meeting you on 22nd and 23rd October in Sheffield City Hall

Join our break-out session from
13:05 to 13:25 in the North Hall

Anaesthesia

Anaesthesia systems for limited resource environments

Intensive Care & Pain Management

A versatile ventilation system assisting breathing around the world

Oxygen Therapy Equipment

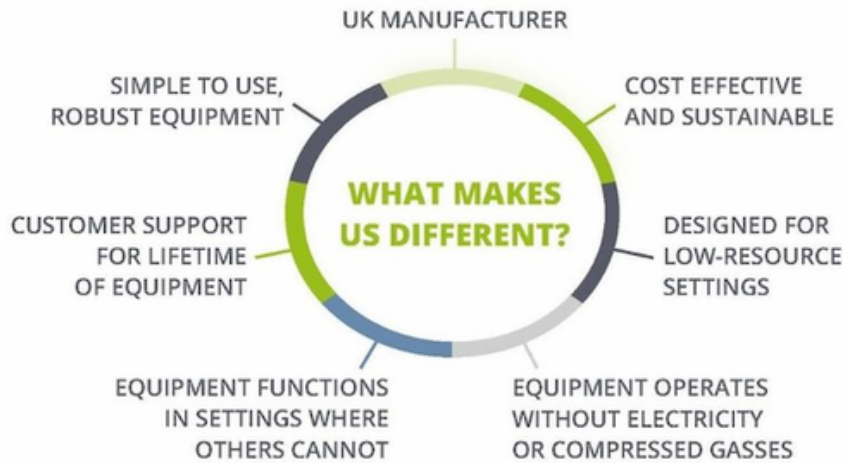

An inexpensive and efficient source of oxygen

Monitoring

A perfect fit for your anaesthesia machine

Diamedica are always striving and succeeding with helping the most vulnerable people in the world, with their incredible inventions that impact in the care of patients in low-resource countries.
